

### **Call for Participation**

We invite you to join us in **13<sup>th</sup> International Conference on Signal and Image Processing (SIGL 2026)**.

This conference serves as a premier forum for researchers, practitioners, and industry experts to present and discuss the latest advances in signal, image, video, audio, and multimodal processing. As the field continues to evolve rapidly driven by breakthroughs in machine learning, computational imaging, large scale sensing, and intelligent systems SIGL 2026 aims to highlight innovative methodologies, emerging applications, and foundational theories that are shaping the future of signal and image processing. SIGL 2026 welcomes original contributions that address both fundamental challenges and real world problems across a broad spectrum of domains, including computer vision, speech and audio processing, biomedical engineering, remote sensing, wireless communication, robotics, and immersive technologies. The conference encourages interdisciplinary work that bridges traditional signal processing with modern AI driven approaches, as well as research that advances robustness, efficiency, interpretability, and scalability in complex environments.
